

## ALTWISE an Leading API Inspection and Testing Company in India

The company has API inspectors that are certified to maintain standards of quality for various aspects of the oil and gas industry by carrying out API inspection.

The American Petroleum Institute (API) establishes international standards for oil and natural gas tanks, piping and equipment. By inspecting and maintaining equipment, inspectors identify areas or structures that may produce errors or possible hazards ahead of time. Thus, saving costs and extending the life of all equipment and avoiding major system failures.

We can perform jobs as per the API codes in:

- Pressure vessel inspection
- Pipeline inspection
- Above ground storage tank inspection
- Risk based inspection
- Refractory inspection
- Fitness for service
- Damage mechanism identification

Risk based inspection & fitness for service pays off very well from a safety & financial point of view

### Advantages of API Inspection

- Improve operational efficiency
- Compliance with regulatory requirements
- Ensure safety and health
- Safeguard the environment

We have well trained engineers who are qualified, experienced and certified by the American Petroleum Institute in different disciplines including:

- **API 510**
- **API 579**
- **API 936**
- **API 570**
- **API 571**
- **API 580**
- **API 653**

**ALTWISE provides Professional API Inspection for Your Business Needs**
